Report Information.....
Executive Summary.....

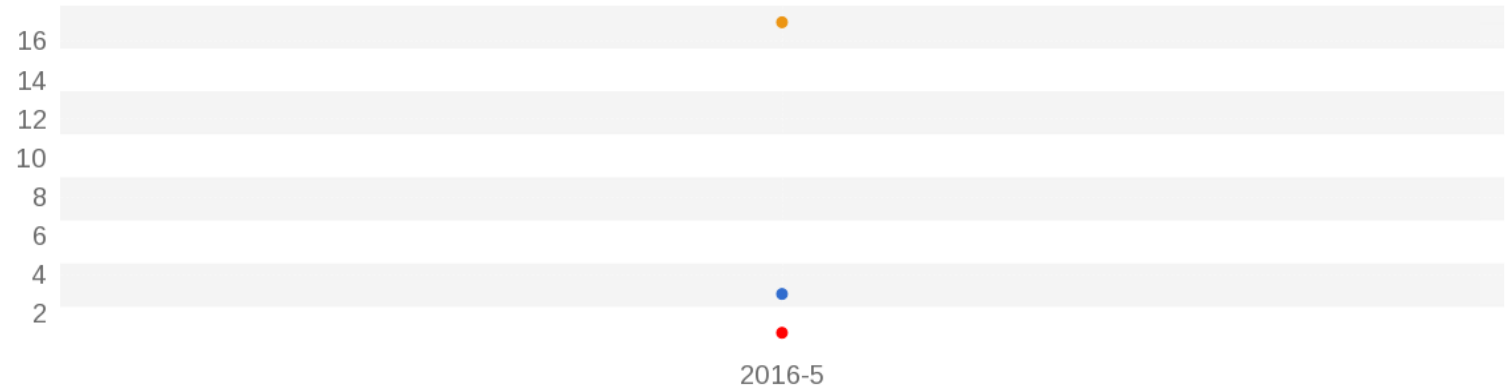

Report Information

Report type	Vulnerability
Report ID	2C91A18F5C73D472681BC8390C03DD6F
Date report was created	2016-05-10 10:21
Timezone for dates	GMT+2
Report created for	Ballou Internet Services AB
Report generated by	Daniel Gullin
Schedule job	TestScan
Scanning interval	2016-05-04 09:57 - 2016-05-04 10:14
Number of targets scanned	1
Number of risks found	21
Findings sorted by	CVSS
Reporting engine	4.1.140.24
Scanning engine	3.3.6
Rules database	2016-05-03 18:38
HIAB hardened	No

Executive Summary

Trend

Average number of findings for each risk level between 2015-05-04 and 2016-05-04

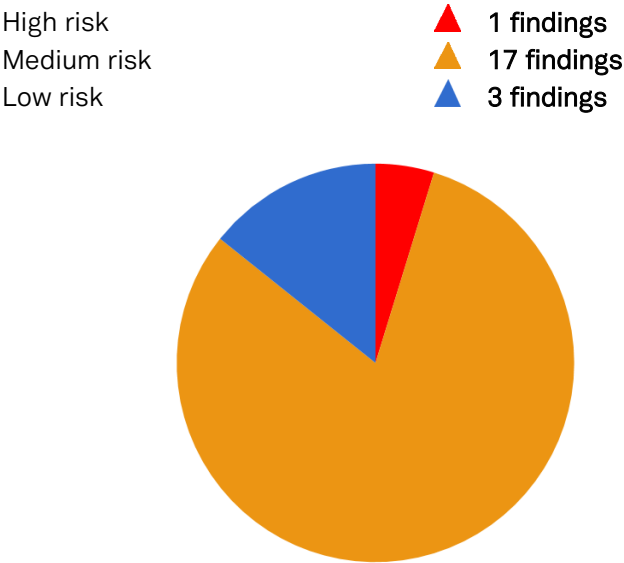

Remediation Trend

Average days of remediation for each risk level between 2015-05-04 and 2016-05-04

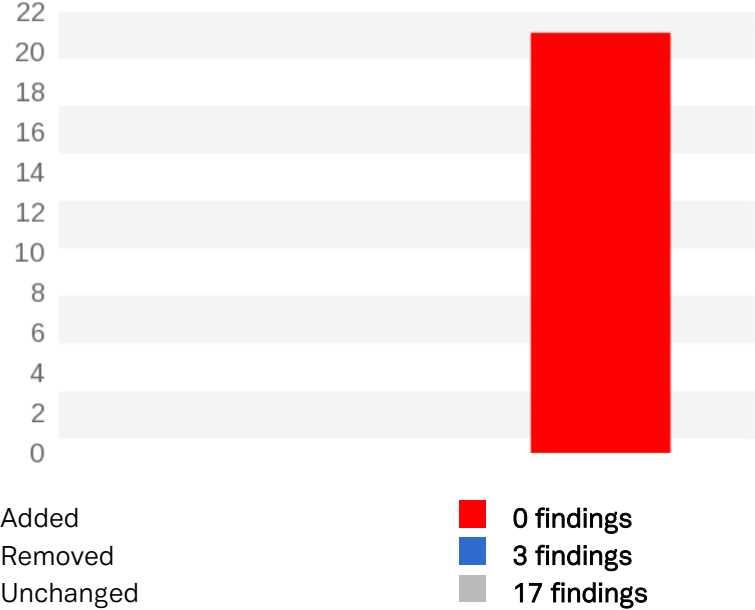

Risk Level Overview

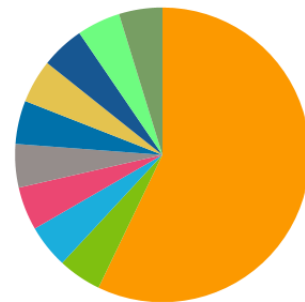

Delta

Number of added and removed findings since last scan

Top 10 Solutions

Solution	Open Issues	Targets
Upgrade to version 7.2p2 or later of OpenSSH	12	1
Require SMB Signatures	1	1
Disable TLSv1.0	1	1
Review certificate	1	1
Use stronger SSH ciphers	1	1
Disable MD5 for SSL/TLS	1	1
Disable weak SSL/TLS Ciphers	1	1
Use secure hash algorithms for certificates	1	1
Enable SMB Signatures	1	1
The vendor has not provided any solution yet	1	1

Vulnerabilities with Remediation age older than 90 days
